

Once we have information via SAMMS we can inquire on our Shipping status (SS) items. At this point we go into <http://wegal.ogden.disa.mil/mrostatus/query.html> to look up additional information on our shipping/transportation number. This web page is very user friendly since you can interrogate by requisition number as well. In this lesson how to track requisitions for shipments delivered by FedEx or other transportation shipper are highlighted.

The screenshot shows a Microsoft Internet Explorer browser window displaying the 'DLA DSS MRO Tracking System' website. The address bar shows 'http://wegal.ogden.disa.mil/mrostatus/query.html'. The page features a search form with a text input field containing 'fb309982730774' and a 'SEARCH' button. Below the search form, there is a table of tracking information for the document number 'FB309982730774'. The table includes details such as 'Quantity Shipped: 500', 'Carrier: FEDERAL EXPRESS', and 'Date Shipped: 24OCT1998'. At the bottom of the page, there are two tabs: 'FedEx Tracking by TCN' and 'FedEx Tracking by Airbill Number'. Three callout boxes with arrows point to specific elements: 'Type in Document Number' points to the search input field, 'CLICK on Search' points to the 'SEARCH' button, and 'Click on FEDEX tracking by TCN or By Airbill Number' points to the 'FedEx Tracking by TCN' tab.

## Date Field Descriptions

MRO-QTY-ORIG (Quantity Requested): The original quantity for a Material Release Order (MRO).

QTY-SHIP (Quantity Shipped): Indicates the quantity of an item, either shipped or billed, which will be entered on a Report of Discrepancy.

CAN-QTY (Quantity Canceled): The amount of a given MRO quantity that DSS wants cancelled.

QTY-DENIED (Quantity Denied): If there is not sufficient stock to satisfy the MRO quantity, a portion of the stock may be denied. The Quantity Allocated and Quantity Denied must equal the MRO Quantity.

DT-REC (Date Received): The date on which the document is received by the shipping depot.

DT-SHPD (Date Shipped): The date, maintained in Issue History, when the Issue Request was shipped from the Storage Activity.

STATUS (Status): Status of the request, SHIPPED, IN-PROCESS, etc.

DEPOT-ADRS (Depot Address): The address used in NOA processing to identify the shipping depot.

MODE-SHIP (Mode of Shipment): Will be used to transport materiel such as Motor-Truckload, Surface, Parcel Post, etc.

CARR-NAME (Carrier Name): The clear name of the common carrier.

Tracking Number: The carrier assigned tracking number for the package.

TCN (Transportation Control Number): Assigned by DSS to control Shipment Units within the Defense Transportation System.

BL-NO (Bill of Lading Number): A pre-assigned, serially generated number that identifies a shipment of freight being transported to a single destination. The number is also used in controlling stock and fixing accountability with the personnel responsible for the issuance and use of bills of lading.
