

## Step by Step Procedures

Once your request for a user's account has been processed, you can access the JTAV application. Enter you user name and password and click **Login**. Note: this is the basic JTAV sign-on screen. Your initial screen may differ depending on what server you access.

After successfully logging-on, the Main Page screen will appear and allow the user launch queries. In addition, useful information for using JTAV is available in the **Resource** area. For example, the **User's Guide** listed on the left contains helpful information on using the system. For a sample query, click on the purple button called **Inventory**.

Start | Eudora Pro | JTAV.doc - Micro... | 1. JTAV Main P... | Microsoft Excel - ... | Workspace at Off... | 1:54 PM

The Inventory query selection screen appears and allows you to initiate a query by: **FSC, NIIN, NSN, NSN & DODDAC, and Nomenclature**. **Note that any custom queries will appear.** For this example, we have a NSN for a UH-60 Rotor Blade. There are two queries that have NSN as the entry argument. The question of which of the two queries to select is an issue. The (hypertext) to the right indicated the column headings that will appear in the query return. For more information as to which query to select, click on the hypertext for **INVEN002**.

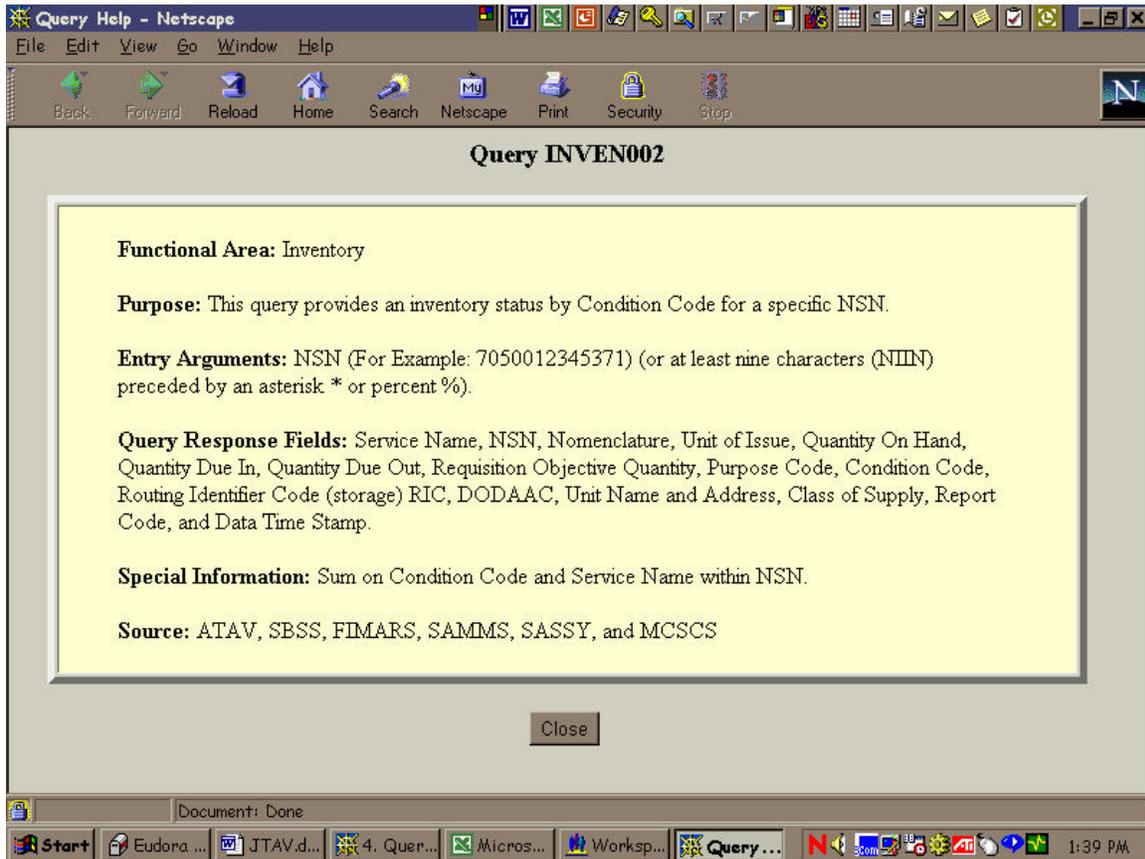

The screenshot shows a Netscape browser window titled "4. Queries by Functional Area - Netscape". The address bar shows the URL "https://214.3.112.119/c4/JTAVWB\_4.frames?l=1.a". The browser interface includes a menu bar (File, Edit, View, Go, Window, Help), a toolbar with navigation buttons (Back, Forward, Reload, Home, Stop), and a bookmarks bar with various links like Valiant, PACDM, Phoenix, Per Diem, JMAR, WebMail, Contact, People, Yellow Pages, Download, and Cha. Below the browser interface is a navigation bar with links for "Logout", "Main Page", "UNCLASSIFIED", "Comments", "Help", and "4.a".

The main content area is titled "Inventory Queries" and contains a table with the following data:

Argument	Sch/Rdy	Queries (Use <a href="#">Custom Queries</a> if no predefined query fits your needs)
No argument		<a href="#">custom.3</a> Bla
FSC		<a href="#">INVEN005</a> NSN, Nomen, UI, O/H, DI, DO, RO, DODAAC, UIC, Svc, RIC, Purp, Cond, Class, Rpt, Data
NIIN		<a href="#">INVEN001</a> Svc, NIIN, Nomen, UI, Purp, Cond, O/H, DI, DO, Rpt
NSN		<a href="#">INVEN002</a> Svc, NSN, Nomen, UI, O/H, DI, DO, RO, Purp, Cond, RIC, DODAAC, Unit, Class, Rpt, Data
		<a href="#">INVEN006</a> Svc, NSN, Nomen, UI, Purp, Cond, O/H, DI, DO, Rpt
NSN & DODAAC		<a href="#">INVEN003</a> NSN, DODAAC, Nomen, UI, O/H, DI, DO, RO, Cond, Purp, RIC, Unit, Class, DataTimeStar
Nomenclature		<a href="#">INVEN007</a> Nomen, Svc, NSN, DODAAC, O/H, Cond, Purp, RIC, UI, Rpt, DataTimeStamp

A red arrow points to the "INVEN002" link in the NSN row. The browser's status bar at the bottom shows the taskbar with "Start", "Eudora Pro", "JTAV.doc - Microsoft...", "4. Queries by Funct...", and the system clock "10:10 AM".

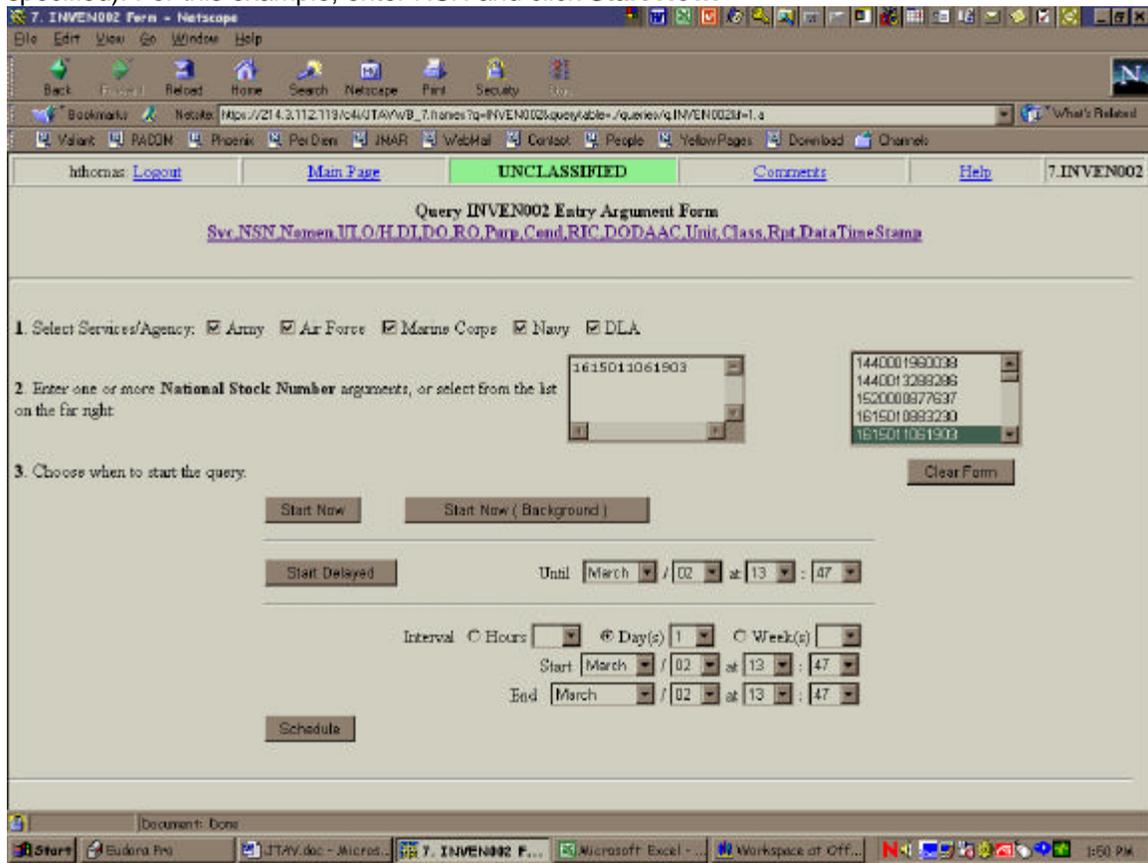

Selecting the hypertext will display a screen similar to this one, which provides information that indicates the purpose of that query, and why you would want to use it.

Note: that the query information screen will give the data sources for the information presented by the query.

After a review of the information, we feel that that query will meet our needs and we select INVEN002 from the query selection screen.

From this screen you can select any or all **Service(s) or Agency, (the default is all)**, enter a National Stock number. You may start the query immediately, or input a delayed query to start at a time and date of your choosing (you don't have to have your computer at the time or date specified). For this example, enter NSN and click **Start Now**.

The query results will look like this and will include: **Qty due-in, Qty due-out, Purpose / condition code, Storage RIC, Unit and DODDAC, Unit Name and Address.**

Start Eudora Pro JTAG.doc - Micros... 10.INVEN002 ... Microsoft Excel ... Workspace at Off... 1:52 PM

Click on the any hypertext in the data display area for additional information. For example, click on **the National Stock Number** and this screen will appear.

The screenshot shows a Netscape browser window displaying a data table. A red arrow points to the National Stock Number (NSN) '1615011061903' in the table. A pop-up window is open, showing details for the NSN and options to run queries. The pop-up window contains the following text:

(1615011061903 already in Hotlist)  
[Run Query RECN\\_003](#)  
[Run Query TRANS008](#)  
 Close

The main data table has the following columns: Svc, NSN, Nomenclature, UI, Qty On Hand, Qty Due In, Qty Due Out, Qty Purp, Cond Code, Stor, DODAAC, Unit Name and Address. The table contains several rows of data for the NSN 1615011061903, including quantities and unit names like 'BLADE, MAIN ROTOR'.

If you clicked on the **Condition Code (A)**, a screen similar would appear and show the condition description.

For more detailed training, go to **Training** button, located in the **Resources** area of the **JTAV Main Page**. This will open a **CBT** and a **JTAV application** both of which can be used for training.”
